DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

on page 13 four lines from the bottom "PN" should be "Pn";

on page 14 line 13 "1-N5" should be "N1-N5"; and

on page 14 line 20 "place" should be "placed".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-4 and 7 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims claim and the specification at page 14 lines 25-26 describes producing strokes which emanate from objects of interest within the image while the specification does not state how the objects themselves will be painted. Van Gogh would surely have painted the objects as well as the area of the image from the objects. Thus, applicant has not enabled one of ordinary skill in the art at the time of applicants invention to create a Van Gogh painting with an emulation Van Gogh's brush strokes.

Art Unit: 2672

4. Claim 7 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This non original claim claims discarding features having a size less than 20 pixels. Page 8 lines 9 and 10 of applicants originally filed specification describes "Preferably, only edges having an length greater than a predetermined minimum are retained in the list". Thus, applicants originally filed specification does not convey that applicant had possession of that which applicant claims in claim 7.

5. Claims 1-4 and 7 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Amended claim 1 claims discarding features having a size less than a predetermined size. . Page 8 lines 9 and 10 of applicants originally filed specification describes "Preferably, only edges having an length greater than a predetermined minimum are retained in the list". Thus, applicants specification described removing edges that are short and claim 1 claims removing features that are small. The claimed features are not the described edges. Thus, applicants originally filed specification does not convey that applicant had possession of that which applicant claims in claims 1-4 and 7.

Response to Arguments

6. Applicant's arguments with respect to claims 1-4 and 7 have been considered but are moot in view of the new ground(s) of rejection.

Drawings

7. The corrected or substitute drawings were received on 10/30/2000. These drawings are acceptable.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hertzman et al., U.S. Patent No. 6,011,536, describes placing long brush strokes along the isocontour lines (column 7 line 53) of an image.
